

Not sure which leakSMART Valve size to buy?

While most U.S. residences have a 3/4" pipe size into their main water valve, you can double-check your home's pipe size by using this template to measure the water piping going into your home's main water valve.

3/4" leakSMART Valve

A 3/4" valve will fit a pipe with an **outer diameter of 7/8" (0.875 inches)**.

You can measure this with a string and ruler, with a measuring tape, or with template provided here.

1" leakSMART Valve

A 1" valve will fit a pipe with an **outer diameter of 1-1/8" (1.125 inches)**.

You can measure this with a string and ruler, with a measuring tape, or with template provided here.
