MSRP:

\$699 Whole Home System

Includes:

ONE leakSMART™ Valve

FIVE leakSMART™ Wireless & Waterproof Leak Sensors

ONE leakSMART™ Hub

TWO AC Power Adaptors and Cords

ONE Ethernet Cord

FIFTEEN AAA Sensor Batteries

ONE Installation and Operation Manual

Availability:

Whole Home System and other options available at getleaksmart.com
Individual system components also available at Lowe's

*Insurance Information Institute, Average Homeowners' Losses

Fact Sheet

leakSMART™: Complete Home Water Protection

Product Description:

leakSMART™ is your complete, wireless solution for water damage prevention.

A small leak in your home can cost you thousands of dollars in less than an hour. But this innovative system can help you eliminate the threat of water damage by detecting leaks and immediately shutting off your water — all in less than five seconds.

This technology is revolutionary, but the system is also easy to use. The patented leakSMART™ Valve connects to your home's main water supply. Wireless, waterproof and reusable leakSMART™ Sensors monitor moisture and temperature, and at the first sign of a leak, a signal is sent to your hub, which triggers the system to shut off the water supply. An app then notifies you of the leak on your mobile device, keeping you in constant control of leak prevention in your home.

Key Features:

- Patented valve**
 The leakSMART™ Valve is a patented, electronic motorized brass water ball valve that connects directly to your home's main water supply, always ready to automatically shut off your water in the event of a leak.
- Reusable sensors**
 leakSMART™ Sensors are wireless and waterproof, so you can easily and continuously monitor moisture and temperature throughout the house.
- Automatic signals**
 When paired with the system, each leakSMART™ sensor is designed to signal your leakSMART™ Valve to automatically shut off your water the moment a potential leak is detected, and to send you instant notifications.
- Audible alerts**
 Each sensor also provides an audible water detection alarm, whether or not it's connected to your smart home system hub.
- Peace of mind**
 If a leak is detected, the leakSMART™ Hub (or other compatible smart hub) receives the sensors' signals and directs your valve to immediately shut off the water supply. It also sends you notification of any sensor activity.
- Instant notification**
 The leakSMART™ app immediately tells you when a leak is detected, and your water is shut off.
- Control from anywhere**
 The app also lets you turn your water off and on from your mobile device, so you're always in control of your water supply.
- Compatibility**
 leakSMART™ is compatible with a variety of smart home systems, including Iris®, Wink and ZigBee®.

Water Damage Facts*:

- One out of every 50 homeowners will experience water damage every year.
- The average water damage claim totals nearly \$8,000.
- Regardless of their home's age, homeowners are actually 3.5 times more likely to experience water damage than theft.

leakSMART™

Round-the-clock monitoring. Split-second leak prevention.

leakSMART™ WIRELESS & WATERPROOF LEAK SENSOR

Each sensor monitors moisture and signals your leakSMART™ Hub at the first sign of a leak.

leakSMART™ APP

Provides instant notification for water shut-off and keeps you in control.

leakSMART™ VALVE

Connects directly to your home's main water supply.

System Components

- **leakSMART™ Valve**
 - Patented, electronic motorized brass water ball valve connects directly to main water supply
 - Operates on AC power (adaptor included), with 4 AA batteries (not included) as a back-up power source
- **leakSMART™ Sensor**
 - Wireless, waterproof and reusable
 - Designed to fit into tight spaces, without shifting or sliding
 - Requires 3 AAA batteries (included)
- **leakSMART™ Hub**
 - Operates on 5V power supply (included)

leakSMART™ App

- Available for iOS and Android

Valve Specifications

- 3/4" FIP x 3/4" MIP

Warranty

- Two-year limited warranty

Certifications

Installation

- Professional installation is strongly recommended for leakSMART™ Valve
- Installation and operation guidance is available within enclosed manuals and at getleaksmart.com

Connects directly to main water supply.
